www.18thavepeacehouse.org

For more information:

Pat Schwiebert 503-706-6583
Carolyn Hammett 503-750-7870

With new treatment options now available, many women are living much longer and living well with metastatic disease. As we do, we have a unique perspective on life and sometimes daily challenges. We gather every Tuesday to support, mentor, share, listen, and celebrate each other.

ADVANCED, STAGE IV and **METASTATIC CANCER** are all terms referring to cancer that has spread beyond the initial location and local lymph nodes to distant parts of the body. Lungs, liver, bones, brain and spinal cord are common areas for cancer to spread to.
